

ENVIRONMENTAL POLICY STATEMENT

Preamble

Earth Environmental & Geotechnical (EEG) is a U.K. based company, founded in 2013, providing geotechnical and geoenvironmental data acquisition, drilling, laboratory and advisory services. EEG are based in Stockport (Cheshire), Wokingham (Berkshire) and Langport (Somerset).

EEG recognises that in pursuing its ground investigation objectives, it has a responsibility and it should take the opportunity to protect and nurture the environment. By exercising proper control over its activities EEG will promote the use of sustainable resources and discourage wasteful or damaging practices.

This Environment Policy Statement sets EEG aims and objectives for safeguarding the environment. It comprises a Policy Statement and details the organization and arrangements for implementing and monitoring the policy.

Under the authority of the main Policy will be a series of specific policies aimed at identified environmental issues. The specific policies set the standards for managing these issues and will be further supported by guidance to assist those responsible to meet the standards.

Statement: (the following statement applies to all land, premises and activities within the control of EEG)

- EEG is committed to the conservation and improvement of the environment and to minimising the environmental impacts of the risks arising from its activities.
- EEG will manage its operations in ways that are environmentally sustainable and economically feasible and where appropriate will provide appropriate environmental education programmes for its staff.

Objectives: (in order to achieve this aim EEG has the following key objectives)

- to promote sound environmental management policies and practices during its activities;
- as a minimum, to comply with the requirements of relevant legislation;
- to make efficient and environmentally responsible use of energy and water;
- to promote environmentally responsible procurement of goods and services;
- to minimise waste production as far as is practicable, to reuse or recycle waste where appropriate and to regulate the treatment and disposal of residual waste;
- to reduce and, where practicable, prevent pollution;
- to minimise the impact of transport on the environment arising from its own vehicles;
- to minimise the adverse environmental impact of the decommissioning and disposal of Company assets;
- to raise awareness of staff and of the Company's environmental impact, activities and performance and to promote individual good practice.

The main responsibility for implementation of this policy lies with the Directors of Earth Environmental & Geotechnical. However whilst the Company accepts the main responsibility for implementation of this policy, individuals have a very important role in co-operating with those responsible for safeguarding the environment and are required to abide by any rules and requirements made under the authority of this policy.

Responsible Personnel:

A. Czarnecki

ADAM CZARNECKI (Managing Director)
