DOCUMENT UNCONTROLLED WHEN PRINTED

**Environment Policy Statement**

The Top Management of Earth Environmental & Geotechnical Ltd (EE&G) is committed to its Environmental Policy as part of its day to day running of its business. To ensure that this policy is clearly defined, understood and effectively implemented at all stages of the company's operations, a documented integrated management system (IMS) has been developed to comply with the requirements of ISO 14001:2015.

The IMS manual specifies the organization and procedures upon which the environmental policy is based. The procedures, which apply to any products or services of the company, have been authorized and must be adhered to for the relevant activity at all stages of the company's operations. All the company's procedures are relevant to the expectations and needs of the customers, the company and the market we work in. The company reviews this policy and the IMS manual at the management review meeting. The management team will also monitor and review the environmental objectives. Top management is committed to satisfying applicable requirements such as those relevant to all interested parties. The contents of this statement will be communicated to all employees, understood and applied. The policy statement will be made available to interested parties upon request.

**The environmental policy statement is:**

- Appropriate to the purpose and context of EE&G and supports its strategic direction.
- Committed to meeting customer requirements.
- Committed to provide a framework for setting environmental objectives.
- Committed to satisfy applicable requirements.
- Committed to continual improvement of the environmental management system and to enhance environmental performance.
- Available and will be maintained as documented information.
- Communicated, understood and applied within EE&G.
- Committed to protecting the environment and preventing pollution.

**The environmental policy statement shall:**

- Take accountability of the effectiveness of the EMS
- Ensure the integration of the EMS requirements into the organisation's business processes.
- Promote the use of the process approach and risk-based thinking.
- Ensure that the resources needed for the EMS are available.
- Communicate the importance of effective environmental management and of conforming to the requirements.
- Ensure that the EMS achieves its intended results.
- Engage, direct and support persons to contribute to the effectiveness of the EMS.
- Comply with environmental legislation and regulatory requirements.
- Make efficient and environmentally responsible use of energy and water.
- The conservation and improvement of the environment and to minimising the environmental impacts of the risks arising from our activities.
- To minimise the impact of transport on the environment arising from its own vehicles
- To raise awareness of staff and of the Company's environmental impact, activities and performance and to promote individual good practice
- Reusing and recycling our waste where possible and to explore new avenues for the recycling and reuse of materials where it is commercially beneficial.
